

PRODUCT DESCRIPTION

MikroJet 02 is a specialized cable blowing machine designed for pushing micro fiber optic cables into HDPE ducts with the help of a cordless or electric drill. Perfect for tight-space operations such as FTTH (Fiber to the Home) installations and indoor projects, this unit supports fiber cable diameters ranging from 1 mm to 6 mm.

DESIGN FEATURES

- Powered by any standard drill (corded or cordless).
- Compatible with fiber cables from 1 mm to 6 mm.
- Adjustable to fit various HDPE duct diameters.
- Forward and reverse operation.
- Durable steel body for long-lasting use.
- Digital meter counter included.
- Hydraulic sealing adapts to cable size.
- Simple setup—can be operated by one person.
- Comes with all essential spare parts.
- 2-year service warranty and 10-year spare parts warranty.
- Supplied in a waterproof marine-grade storage box.
- Remote support available through our technical assistance line.

TECHNICAL CHARACTERISTICS

Construction	Description
Micro Cable Diameter	1~6mm
Micro Tube Diameter	5,7,10,12,14,16 mm
Blowing Distance / Max	1000m (Depends Drilling Force)
Blowing Speed / Max	50 m/min(Depends Drilling Force)
Pushing Force	Depends Drilling Force
Work Pressure / Max	15 bar
Dimensions (L*W*H)	150*200*250mm 5.91*7.87*9.84in
Weight (approx.)	7kg
Power Source	Drilling Machine
Drive System	Mechanical, via drill connection
Operation Type	Depends Drilling Force
Warranty Period	48months
Applications	FTTH/FTTx, micro cable networks, indoor installations
Required Compressor's Efficiency	micro ducts up till 8mm:0.8m ³ /min micro ducts between 8-12mm:1.0m ³ /min micro ducts between 12-15mm:1.5m ³ /min

STANDARD ACCESSORIES

- Cable feeding beds for all sizes (inlet and outlet)
- Duct adapter set (customized to your duct dimensions)
- Drill connector adapter
- O-ring set for sealing
- 1 mm— 3 mm cable bed (inlet & outlet)
- 4 mm— 6 mm cable bed (inlet & outlet)
- Allen wrench set
- Compressor hose coupler
- Accessory and spare parts box
